

## Blended intensive programme (BIP)

# Comparative International Perspectives on Education: Inclusive Education Practices for diverse learners

- ✓ Are you interested in inclusive teaching and learning?
- ✓ Are you curious about approaches to diversity and inclusion?
- ✓ Do you want to meet students from all over Europe in Örebro (Sweden) to discuss these topics for a week in March 2024?

The programme combines innovative virtual and in-person ways of teaching and learning to explore the topic of inclusion in European education. Participants will reflect on the way how different school systems deal with inclusion and will compare teaching and learning materials from specific European countries by making use of a criteria catalogue that has been developed by an international team of experts on inclusion. An online learning platform with resources will be made available to the participants throughout the digital phase of the programme.

Please contact your home university for more information
